

ASO 05 - dryer for 2 coats

ASO 05 is a clothes dryer designed for two coats that works on the principle of forced heated-air flow. The dryer shall be attached to wall by means of expansion bolts and sockets. The dryer is to be connected to a plug by means of a jack cord. To control the drying time setting it is favourable to equip the dryer with a clock switch. The dryer reduces the time of drying to 1/3 in comparison to free drying at 20°C.
