

## MSE2 P - stainless steel columns for paid release of electricity and/or water

MSE 2P are stainless steel columns for paid electricity and/or water release. After inserting coins into the control it is possible to use paid appliances until the pre-paid credit is spent. It is possible to prolong the time by inserting another coins during the operation. The coin automat can accept two different currencies (standardly CZK and EUR which can be changed on order). Each el. sockets includes overcurrent and short-circuit protection as well as protective switch. Looping of el.cables is possible inside the column, therefore it is not necessary to connect every column by individual el.cable from central switchbord. Each column is equipped with small roof protecting the stand against direct rain and with opening in its lower part for ventilation. On order it can be also equipped with light. MSE 2P are manufactured from the stainless steel AISI 304. Other materials (e.g. AISI 316) possible on order. For cleaning we recomnend WÜRTH detergents ? material preservation (no. 0893 121 K) and material cleaning (no. 893 121 1).

Complete delivery

1. stainless steel stand
2. coin-operated automat
3. lockable money box (according to version type)
4. electronics
5. electricity meters and protective switches (according to version type)
6. water-meters (according to version type)
7. el.sockets and its connection
8. water valve (according to version type)
9. lock
10. anchoring construction

Requirements for setting up the construction

1. Set-up concrete base for installation of anchoring bolts
2. Set-up supply cable to the middle (? 50 mm) of the column base

Basic technical information	Max.outer dimensions	440 × 300 × 1470 mm
	Input voltage	3× 400 V, 50 Hz, TN-S
	Max.cross section of el.cable	5× 25 mm <sup>2</sup>
	Looping of supply cables	yes
	Output voltage	230 V
	Output current	10 A
	Acceptable coins	1, 2, 5, 10, 20, 50 CZK
		0,1; 0,2; 0,5; 1; 2 ?
	Adjustable price of electricity	5 ÷ 50 CZK/kWh (0,2 - 2 ?/kWh)
