

AUM 023.1 - Rozsdamentes acél mosdó, el?kevert vízhez, AUM 3 típusú csappal ellátva

AUM 023 is a stainless steel washbasin, which can be used as more durable and hygienic substitution of standard ceramic washbasin. It is intended to be mounted on the wall. Complete delivery includes waste trap and all anchoring material. Round inner sink gives an interesting design to this washbsin. Standard version does not include the opening for the tap. Opening can be made free of charge. Its diameter and location must be specify with the order. The washbsin can be fitted with the automatic tap AUM 3 in all version types - connected to one water, to hot and cold water or with thermostatic valve, supplied with 12 V from power supply ZAC or with 6 V from AA batteries. After consultation it is also possible to fit the washbasin with other automatic tap from our production range. Standard version has a satin surface finish (sandblasted matt finish is possible on order). The washbasin is manufactured from the stainless steel AISI 304. For cleaning we recomnned WÜRTH detergents ? material preservation (no. 0893 121 K) and material cleaning (no. 8931211).
