

AUM 022 N - Rozsdamentes acél mosdó, csapterep nélkül

AUM 022 is a small stainless steel washbasin intended to be mounted on the wall. Due to its small size, this washbasin is suitable especially for areas with less space where the requirements for hygiene are required. The washbasin is produced in two standard version types: with fixing consoles (AUM 022N) and more durable version with stainless sheathing (AUM 022Z). Surface finish is standardly brushed, but sandblasted matt finish is possible on order. The washbasin can be delivered either without an automatic tap, only with opening of diameter of 29 mm for the tap or fitted with our popular automatic tap AUM 3 in all version types - for one water, for hot and cold water or with thermostatic valve. All version types can be supplied with 12 V, 50 Hz (from source ZAC) or with 6 V (from AA batteries). The washbasin is manufactured from the stainless steel AISI 304. For cleaning we recommend WÜRTH detergents ? material preservation (no. 0893 121 K) and material cleaning (no. 8931211).
